Message From The Principal

It gives me immense pleasure to inform you that school is celebrating successfully its fourth year of formation. I am sure the Newsletter "Creations" will not only reflect the last year achievements and activities but will also highlight the contribution of staff and students who have kept the flag of Doon Public School flying high.

We know that we offer an outstanding educational program and we care for our students, in partnership with parents, in a way that provides students with the best opportunity to achieve success and to enjoy their school years

The School's genuine concern ensures student's emotional growth along with intellectual excellence. This empowers them to develop their self-esteem, self-awareness and self-confidence. Sharing ideas, analyzing situations and expressing them confidently are essential skills which are honed here, through Experiential Learning.

Besides rigorous scholastic programmes, we seek to develop and nurture the different facets of a child. From academic to dance, theatre, music and a variety of sports, we focus on developing both, the mental and the physical abilities of a student. The activities provide holistic grooming to the student wherein the child is able to explore his true potential. Besides the usual procedural teaching, we persistently upgrade and update our teaching tools and techniques.
I wish the publication all success and a bright future to the students.

MESSAGE

It is matter of immense pride that Doon Public School, Hathras is bringing out its special edition of Newsletter 'Creations' in the end of academic session 2019-20.

The school is today recognized as an institution par excellence, imparting value based and quality education. The school has over the years been continuously producing excellent scholars and quality education. I am sure that Doon Public School will always be a beacon of light guiding the destiny of its students while radiating kindness and compassion as it soars high in its pursuit of excellence in all fields.

"There is really one way to learn something and that is by doing it" Experimental education is when learners actively engage in activities or experiences. I believe that all educators must be practicing in the school as a facilitator and must encourage the idea of "learning" as inherently tied to "doing". Students must learn better as they are engaged in the learning process, whether it is for academics or life skills, educators must strive to inculcate healthy habits among children.

I would like to congratulate the Principal and staff for their commendable efforts. I hope the School will continue to scale new heights of glory in times to come.

I wish the publications all success and a bright future to the students.
